TAXPAYERS FOUNDATION

COMMENDS SENATE PRESIDENT AND SPEAKER ON CIVIL SERVICE CAREER EXECUTIVE BILL CITES NEEDS FOR MODERNIZATION

"Senate President, Maurice A. Donahue and House Speaker, Robert H. Quinn, have demonstrated their interest in modernizing the state's civil service and personnel system by filing a bill (H.4181) this month providing for career executive assignments," Frank J. Zeo, Executive Vice President of the Massachusetts Taxpayers Foundation, told the Everett Rotary Club today.

"They surely should be commended for this forward-looking action," he said.

Zeo explained that the career executive program is designed to attract highly qualified and carefully chosen people to selected positions of high administrative and policy-influencing levels in government employment. These positions would be designated by the Director of Civil Service who would give the examinations and maintain an eligibility list.

"The program is sort of a super-merit system started in California in 1963," Zeo continued. "It is similar to the federal system initiated in 1966 and was recommended last year by the Massachusetts Democratic Advisory Council.

Zeo said that the Taxpayers Foundation has studied the new program and "we are most enthusiastic about it. The Civil Service Council has carefully drafted its own version of legislation to create such a program. This proposal has been made available to the Legislature and to others.

"In the career executives program," what we're talking about is earmarking only three of four hundred sensitive career jobs in the state service...jobs which could be filled in the near future by the best qualified people available. This is only one-half of one percent of the 60,000 jobs in the state service. "Is this too much to ask in helping to raise the quality of our state government?" Zeo asked. "We don't think so."

"As you and I look to Beacon Hill, this could be a year of exceptional accomplishment for the Governor and the Legislature," Zeo told the Everett Rotarians. "It could be a year when we could change the Commonwealth's archaic, broken-down and costly personnel management system to a modern system adapted to today's highly competitive times. The sooner the Governor and the Legislature act, the sooner the citizen-taxpayers of Massachusetts and their servants reap the benefits.

"As taxpayers, you and I are

supporting a state and local payroll of close to \$1,200,000,000 a year covering about 210,000 employees with the state pay all alone spiraling upward at the rate of over \$3,000,000 a month.

"There just isn't enough money to pay for all the wants and needs of our state if we intend to spend within the limits that taxpayers can reasonably be expected to pay," Zeo continued. "Our state budget now exceeds \$1,200,000,000 and we haven't seen the ceiling yet. It's going to take hundreds of millions of dollars more in the next decade to finance programs already authorized. More taxes are not the whole answer even though more state taxes will be needed again starting next year.

"But we must also step up our efforts to curb unnecessary spending and to find other ways and means of stretching tax dollars.

"I can think of no better way of improving the quality of the Commonwealth's government while holding down future tax increases than to modernize the state's civil service and personnel system. This is the foundation upon which we must build any attempt to get better government at reasonable cost," Zeo emphasized.

"When we start to examine what's wrong on Beacon Hill, we come right down to the problem of people. When you criticize government, you're criticizing people in government and here in Massachusetts, all of us, both in and out of government are victims of a hopelessly bad personnel and civil service system."

Citing numerous specific examples of the weaknesses of the Commonwealth's civil service system, Zeo asked "How can we expect to run our government efficiently and economically without good people?"

"We simply can't," he said. "This means we'll continue to have a first-class mess on our hands unless the Legislature changes the system. We can expect costs to increase and we can expect a major breakdown in state services, more trouble like the trouble we've had at the Bridgewater Institution for the Criminally Insane, at the Fernald School for the Mentally Retarded and right now at the Deer Island Sewage Treatment Plant in Boston Harbor. In all these cases there were failures in some aspect of personnel management."

Zeo called upon the

community leaders to communicate their views to Beacon Hill and to help develop strong public sentiment in favor of meeting the Commonwealth's Number One Need - Civil Service and Personnel Modernization.

BENJAMIN PHELPS SCHOLARSHIP DRIVE RAISES \$1553 FOR SCHOLARSHIPS

The Agawam Council of Parent-Teacher Associations announces that \$1553 has been collected for the Benjamin Phelps Scholarship Fund running short of last year's collection of \$1800. This will mean that only 16 one hundred dollar scholarships will be given instead of the 18. Any one wishing to contribute should contact Mrs. Michael Demko, 1186 Main St., Agawam, Mass. 01001.

About eighty students graduating in June from the high school have applied for help from this scholarship fund.

This fund provides scholarships which are awarded to deserving students chosen from the graduating class of the Agawam High School for the purpose of furthering their education. Any Agawam High School Senior may apply.

The committee expresses sincere thanks to all who took part in this drive, junior high students, high school students, PTA units, school principals, teachers and the Girl Scouts of Troops 177 and 217 who prepared the tags for the tag day canvass.

Serving with Mrs. Michael Demko was Mrs. Edward Moriarty.

ADULT SUMMER SCHOOL CLASSES TO BE HELD IN WEST SPRINGFIELD

The twelfth summer school conducted by the Commonwealth of Massachusetts, Department of Education, Bureau of Adult Education and Extended Services, will be held at the West Springfield High School from June 24th to August 1st. The classes will be held three evenings a week for six weeks.

Classes are conducted in high school subjects for adults and youths who wish to make up deficiencies, review courses for better understanding, supplement high school programs, or attain advanced standing.

Subjects to be offered in the 1968 summer school include: algebra I, algebra II, biology, bookkeeping I, business mathematics, chemistry, earth science, economics, English IX,

English X, English XI, English XII, French I, French II, general mathematics, general science, geometry, German I, German II, Latin I, Latin II, physics, shorthand I, Spanish I, Spanish II, trigonometry, typewriting I, United States history, world geography, world history.

THE LOUD SOCIETY

"Like water pollution and air pollution, we don't want it but our technology keeps turning it out."

So declares the TV newscaster; the "it" in his sentence refers, of course, to "sound pollution" or excessive noise. And as though to underscore the point, his appearance on the screen is followed by the sudden surprise bellow of a pitch-man plugging the station's "coming events," aided by screaming sound effects, crashing music, yelping voices, and psychedelic visual patterns.

Maybe it's an old story by now—the story of man's struggle for health and sanity undercut by his passion for gadgetry. Raucous electronic sounds make exciting sales pitches, which generate higher turnover, which produce more prosperity, which requires still more violent sounds to produce still more prosperity.

Similarly, whether in manufacturing, construction or transportation, maximum achievement often seems to mean maximum noise. Or, as one psychologist ironically summed it up, "Happiness is self-inflicted migraine."

Meanwhile ear specialists, psychologists and efficiency experts keep noticing the side effects. Steady supersound, they warn, can cause hearing damage, high blood pressure, indigestion,

All distances in Cuba are measured from a 24-carat diamond set in the floor of Havana's Capitol building.

fatigue, and increased accidents due to distraction. Everybody agrees, while things get noisier. Looming in the near distance are the sonic boom and a further crescendo of electronic merchandising.

But the picture isn't altogether bleak. Noise control programs exist in a number of cities, and some have made a little headway. What we can all do is to tell our Congressmen (while they can still hear us) to get behind one of the many federal noise control bills now languishing for lack of active support.

HERE IS A TRUE STORY OF A CAR THEFT

On Memorial Day many boys were at the beach. A few had some beer and in the heat of the day they got a little high. A boy drove up in a station wagon and stopped at a phone booth to make a call. He left the motor running.

To his consternation he saw a kid he knew slightly run up from the beach, jump into the station wagon and drive off at a terrible speed. The car headed for town and the boy notified the police of what had happened.

Half-an-hour later the police had a report. The stolen car had side-swiped another car on a turn at such a speed that the station wagon was a total loss. The thief had run off in terror but had been caught, slightly drunk. He said he had just gone home to get more ice.

In the sequel the thief got a suspended sentence, but the insurance company got a judgment against his family for \$1000. This made it impossible for the boy to go to college.

This is a less dramatic story than the usual ones told to persuade you to always lock your car and never leave the motor running when you're not in it. A boy could be sent to reform school, he could be involved in a fatal accident or a crime just because he swiped a car.

The point is that a chain of misfortune often begins because a car is unlocked, because the motor is running, because the wrong opportunity has been offered.

"Well, I hope that's the last we see of that!"

PHELPS SCHOOL

MONDAY, Juice, Grilled Frankfurt on Buttered Roll, Relish and Mustard, Buttered Carrots, Cheese Cube, Applesauce, Milk. TUESDAY Baked Macaroni and Hamburg w/ Tomato Sauce, Cabbage and Carrot Salad, Bread and Butter, Peaches, Milk. WEDNESDAY, Pork in Brown Gravy, Mashed Potatoes, Buttered Cabbage, Bread and Butter, Jelly Donut, Milk. THURSDAY, Juice, Grilled Hamburg on Buttered Bun, Onion Slices and Relish, Buttered Corn, Applesauce, Milk. FRIDAY, Juice, Pizza w/ Cheese & Tomato Sauce, Tossed Salad, Fresh Apple, Peanut Butter Cookie, Milk.

GRANGER SCHOOL

MONDAY, Juice, Grilled Hamburg on Bun, Relish and Catsup, Cheese Cube, Onion Rings, Buttered Vegetables, Applesauce, Milk. TUESDAY, Spaghetti w/ Meat and Tomato Sauce, Buttered Green Beans, Bread and Butter, Fruit, Milk. WEDNESDAY, Juice, Pork in Brown Gravy, Mashed Potato, Whole Kernel Corn, Hot Cornbread, Custard Donut, Milk. THURSDAY, Juice, Chicken Salad Sandwich, Potato Chips, Buttered Broccoli, White Cake w/ Fudge Sauce, Milk. FRIDAY, Tomato Soup, Meat Sandwich, Peanut Butter Sandwich, Celery and Carrot Sticks, 1/2 Hard-boiled Egg, Cookies, Fresh Fruit, Milk.

PIERCE SCHOOL

MONDAY, Beef - Vegetable Stew, Carrot Stix - Cheese Muffins, Peanut Butter Sandwich, Orange Jello w/ Topping, Milk. TUESDAY, Spaghetti w/ Tomato - Meat Sauce, Buttered Mixed Vegetables, Cheese Cube - Bread & Butter, Fruit Bar, Milk. WEDNESDAY, Orange Juice, Chicken - Rice Soup w/ Vegetables, Chicken Salad Sandwich, Potato Chips, Carrot Stix, Ice Cream Bar, Milk. THURSDAY, Orange Juice, Baked Pork Slices w/ Brown Gravy, Whipped Potatoes - Buttered Peas, Peanut Butter & Honey Sandwich, Frosted Cup Cakes, Milk. FRIDAY, Baked Beans, Stewed Tomatoes, Clery Stix, Cheese Wedge, Hot Corn Bread, Tutti Fruit Pudding w/ Whipped Topping, Milk.

DANAHY SCHOOL

MONDAY, Juice, Frankfurt on Buttered Roll, Relish and Mustard, Cole Slaw w/ Carrots & Green Peppers, Cake Square w/ Fruit topping, Milk. TUESDAY, Shell Macaroni w/ Meat & Tomato Sauce, Buttered Green Beans, Cheese Wedge, Bread and Butter, Sliced Peaches, Milk. WEDNESDAY, Juice, Sloppy Joe on Bun, Cheese Sticks, Buttered Corn, Ice Cream, Milk. THURSDAY, Roast Turkey w/ Gravy, Mashed Potatoes, Buttered Broccoli, Cranberry Sauce, Bread and Butter, Fruited Jello w/ topping, Milk. FRIDAY, Juice, Tuna Fish Sandwich, French Fried Potatoes, Tossed Salad, Applesauce Cake w/ Icing, Milk.

SOUTH ELEMENTARY SCHOOL

MONDAY, Orange Juice, Sloppy Joe on Hard Roll, Buttered Carrots, Cheese Sticks, Citrus Fruit Cup, Milk. TUESDAY, Hot Open Pork Sandwich w/ Gravy, Glazed Sweet Potatoes, Home Made Yeast Roll, Spiced Applesauce, Milk. WEDNESDAY, Baked Turkey w/ Macaroni & Vegetables, A.B.C. Salad, Peanut Butter on Rye, Citrus Orange Jello w/ Topping, Milk. THURSDAY, Citrus Juice, Chicken w/ Gravy on Buttered Rice, Green Tossed Salad, Buttered Pan Biscuit, Peaches, Milk. FRIDAY, Baked Macaroni w/ Cheese, Fruit Slaw Salad, Danish Buttered Roll, Fruit, Milk.

ROBINSON PARK SCHOOL

MONDAY, Juice, Meat Ball Grinder w/ Sauce, Buttered Carrots, Cheese Sticks, Citrus Fruit Cup, Milk. TUESDAY, Roast Turkey in Gravy, Mashed Potatoes, Buttered Broccoli, Cranberry Sauce, Bread and Butter, Ice Cream, Milk. WEDNESDAY, Orange Juice, Hamburg on Buttered Roll - Catsup, Buttered Corn, Butter Cake w/ Strawberry topping, Milk. THURSDAY, Baked Lasagna w/ Meat & Tomato Sauce, Buttered Green Beans, Bread and Butter, Applesauce - Milk. FRIDAY, Juice, Tuna Fish Salad Sandwich, Peanut Butter Sandwich, Tossed Salad w/ Spinach & Tomatoes, Dessert, Milk.

JUNIOR HIGH SCHOOL

MONDAY, Juice, Meat Ball Grinders, Cabbage and Carrot Salad, Pineapple Chunks, Milk. TUESDAY, Juice, Hamburg on Bun, Green Beans, Peanut Butter Sandwich, Fruit Cup, Milk. WEDNESDAY, Juice, Roast Chicken in Gravy, Mashed Potato, Broccoli, Jello w/ topping, Milk. THURSDAY, Juice, Shell Macaroni w/ Meat Balls, Tossed Salad, Bread and Butter, Chocolate Cake, Milk. FRIDAY, Juice, Tuna Fish Salad, Potato Chips, Buttered Carrots, Bread and Butter, Butter cake w/ Chocolate sauce, Milk.

HIGH SCHOOL

MONDAY, Toasted Ham & Cheese Roll, Mustard, Mayonnaise, Catsup, Garden Salad w/ Spinach Greens, Peanut Butter Sandwich, Grapefruit Sections, Milk. TUESDAY, Meat Ball Grinder, Cabbage and Carrot Salad, Peanut Butter Sandwich, Raspberry Prune Pie Square, Milk. WEDNESDAY, Orange Juice, Hamburg on Buttered Roll, Potato Chips, Buttered Carrots, Peanut Butter Sandwich, Jello w/ topping, Milk. THURSDAY, Juice, Potato Salad, Bologna Slices, Buttered Green Beans, Cheese Wedges, Bread and Butter, Peanut Butter Cookies, Milk. FRIDAY, Tuna Salad Sailboat, Oven Fried Potatoes, Fresh Vegetable Tray, Chocolate Pudding w/ topping, milk.

SAFE LAWN MOWING

Rotary power lawnmowers are efficient and easy to use in cutting almost any lawn. Although most mowers complying with design and construction standards carry a large triangular seal with the maker's certification that the machine conforms to national safety specifications, the seal is no guarantee against mishap. Protect yourself and others.

Before You Mow

The Massachusetts Nurserymen's Association suggests that you learn about your mower and its controls thoroughly. Read the instruction manual, and follow its recommendations.

Fill the fuel tank before starting, and don't refuel a hot or running engine.

Clear the area of children, adults, and pets.

Pick up foreign objects that could be thrown by the blade.

Start the mower only where your footing is firm. Don't mow wet grass.

While You Mow

Keep your feet clear of the machine. Push it ahead as you walk - don't stop and pull it back towards your feet. Watch for foreign objects.

Stay away from the discharge side of the mower, and never "aim" the discharge in the direction of people. Also, be careful about discharging against fences, objects, or walls from which debris might rebound after leaving the mower.

Stop the engine or disengage the clutch before pushing the mower across roads, driveways, or rough areas. Be wary of holes that could allow a wheel to drop, putting the blade against the ground. Always stop the engine before leaving the mower, even for a moment.

Mow across the slope with a walk-behind mower, not up and

down it. Be cautious with riding-type machines on slopes or uneven ground. With a "rider", always mow up and down the slope to prevent tipping.

Don't allow children to operate the mower or to be around when it is running

Shut off the mower and then wait a few minutes before unclogging. Overheated mowers may turn over a few times even after the motor has been stopped. Before tipping the mower for inspection, stop the engine and disconnect the spark plug wire. Remove the spark plug when you work on the mower's underside to eliminate any chance of firing.

Be aware of these potential dangers when using power equipment and you will have many years of injury-free use from them.

SOUTH ELEMENTARY P.T.A.

South Elementary P.T.A. held its annual installation banquet on April 24 in the school cafeteria. Mrs. Gellman, school art director, presented an art show of the children's work. After the dinner, the fifth and sixth grade chorus sang several selections under the direction of Mrs. Stark-e-y.

The nominating committee, with Mr. Harold Burnett, chairman, assisted by Mr. James Babcock and Mrs. James Moran, presented the following slate of officers for election: President, Mr. Paul Pappas; Vice President, Mr. Harold Burnett; Secretary, Mrs. Irene Thomas; Treasurer, Mrs. Dorothy Duda. These officers were installed by Mrs. Edward Moriarty.

Gifts were presented, by Mr. Pappas, to Mrs. Raymond Jones and Mrs. James Conkey, who are retiring from the teaching profession at the end of the school year in June.

Cut Calory Intake To Trim Waistline

Counting calories is a favorite pastime among those of us who want to lose weight.

The term "calory" is used as a unit in expressing the energy-producing value of food. When we say that a tablespoon of honey contains about 100 calories, it means that the honey, when utilized by the tissues of the body, will release that amount of energy to be expended in bodily activity.

The usual weight-reduction goal of one or two pounds' loss per week is achieved by a daily intake of 500 to 1,000 calories less than the intake needed to maintain the weight at which reducing was begun.

The American Medical Association's home health book, Today's Health Guide points out that 1,000 calories represent the smallest practical intake that can provide the recommended daily allowances of essential minerals and vitamins through usual food sources. For children, the minimum figure on which to lose weight is close to 1,600 calories, with 1,800 often recommended to ensure a margin of safety.

But all of us are different, and caloric needs are an individual affair. They should be worked out in consultation with your physician. He can help you arrive at a reasonable figure, permitting you to lose weight steadily and gradually, and at the same time maintain good health and not go hungry.

Liquid formula diets unquestionably have helped many persons to lose weight. Although some of these preparations combine the merits of economy, acceptability and nutritional balance, they lend themselves to short-term, intensive

weight loss. This only postpones the day of reckoning when the dieter must return to usual food-stuffs.

Calory charts will help guide you in determining what you can eat, and in what quantity, to maintain your desired daily intake. Some diet specialists now recommend five or six small meals a day, rather than two or three large ones. Others favor periods of complete fasting at the onset of the diet for an excessively overweight person.

Whatever program your physician prescribes for you, there is one important thing to remember—calories do count. To lose weight, we must expend more energy than we take in.

A faster, safer and more reliable method of putting out fires is being accomplished by fluorochemicals, shown being sprayed onto a burning plane from a hose. Such chemical foam reportedly is helping to extinguish fires in Viet Nam.

Strange Group Of Chemicals Succeeds By Doing Nothing

N-55

NEW YORK (CFN)—A little-known group of chemicals today is being used for such varied jobs as snuffing out roaring oil fires, protecting clothing and furniture from stains, increasing the efficiency of jet engines and encasing artificial bones implanted in humans.

Called fluorochemicals, these substances are formed by combining peaceful carbon with the wild and unpredictable fluorine.

A decade ago, a small experimental project was started to examine the usefulness of these synthetic materials to give oil and water repellency to textiles.

Fluorochemicals today are produced in liquid, semirigid and rigid forms and are performing a wide range of unusual tasks in the home, industry and outer space. These exotic compounds today can smother oil and gasoline fires, encase artificial bones and other medical devices installed in the human body, cool sensitive electrical equipment, and protect packages, menus and other paper products from oily and watery stains.

Fluorochemical inert liquids do not mix with oil and water, do not react with metals or plastics, remain stable at high temper-

atures and will not conduct electricity less than 35,000 volts. A tape recorder immersed in a fluorochemical fluid works perfectly and the sound can be transmitted to an amplifier without being affected by the fluid.

A fluorochemical treatment for glass is currently being evaluated as a means of helping airline pilots see in rainy weather. The treatment forces raindrops to break up in tiny beads which are blown away by wind.

In solid state, products fashioned from fluorochemicals can withstand extremely high or low temperatures, resist attack by alkalies and acids and can be machined to the tolerance of steel.

Fluorocarbon seals, o-rings and valve linings are being used in the presence of liquid hydrogen and liquid oxygen in the engines of space vehicles.

Delicate sensing instruments

encased in "Kel-F" plastic can be harmlessly implanted in a human head to measure signals from certain areas of the brain. Fluorocarbon plastics are among the few foreign substances the body will not reject.

In the packaging field, where the appearance of a package is an important consideration to the shopper, a fluorochemical called "Scotchban" prevents staining from oily or greasy materials inside cartons and sacks.

The chemical, being incompatible with oil, is applied to the outer layer or overwrap of the package and resists staining from the inside by dog food, snack foods and other edible products containing oily material.

The forerunner of this diverse chemical group, "Scotchgard" repeller, is finding widening use today as a rain or stain repeller on raincoats, jackets, slacks, slipcovers, upholstered furniture, tablecloths and even suede leather goods.

A more exotic offspring of this basic chemical technology is a new fire fighting foam with unique abilities to snuff out the most intense oil, gasoline or chemical fires in seconds.

Dubbed "light water", the frothy foam is much lighter than ordinary protein foam compounds and spreads an extremely thin coating over oil surfaces to pre-

vent the formation of vapors and thus flames.

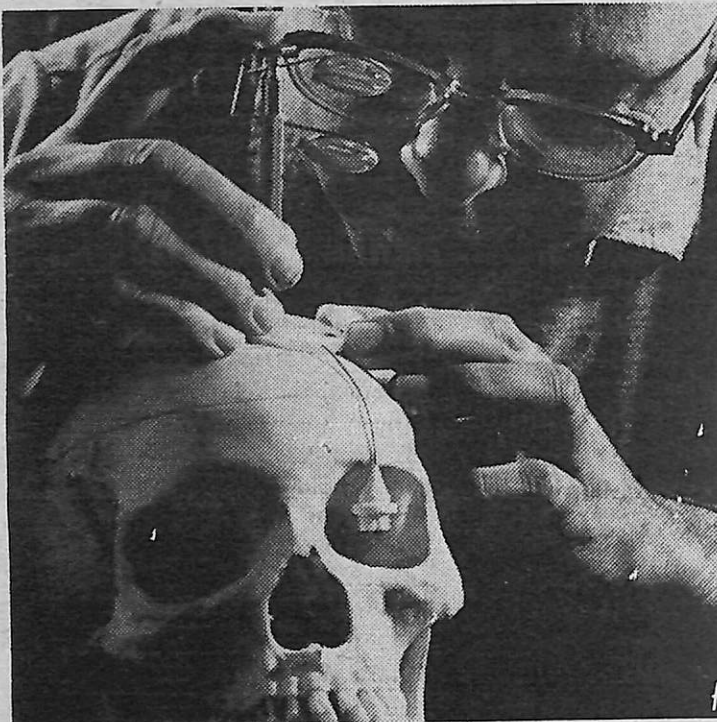

Proper use of this new chemical may mean the saving of lives of airplane crash victims. Because the foam will hold back encroaching flames once a thin blanket has been laid down, a corridor could be cut through a flaming fuel pool to provide victims with an escape route.

Fluorochemicals originally were developed by Dr. Joseph Simons, then a professor at Penn State University. 3M Company purchased rights to Simons' incomplete process and established a laboratory to develop and commercialize these products.

Dr. H. G. Bryce, technical director of 3M's Chemical Division, feels that fluorochemicals will be among the more dazzling of the products of the future.

"Some day we may do away with automobile windshield wipers because a fluorochemical film may prevent rain from distorting vision," he said. "It's conceivable that the car of the future may have to be lubricated only once because a thin coating of a fluorochemical on metal will keep oil from leaking away from working parts."

Dr. Bryce points out that these speculations are "blue sky," but adds, "with products that succeed by doing practically nothing, almost anything is possible."

Doctors use instruments contained in fluorochemical plastics. Other materials might react with body acids and alkalies. Here an instrument contained in fluorochemicals is attached to a model skull to illustrate how it can be used to stimulate body areas.

PIONEER PACKAGING, INC.
165 FRONT STREET CHICOPEE 5988316

She--You say you love me,
but would you be willing to die
for me?

He--Well, er, no. You see,
mine is what they call an un-
dying type of love.

St. Moritz, Switzerland--In-
structors are refusing to teach
girls to ski who wear gold and
silver lame ski clothes or shiny,
lacquered trousers. The explana-
tion, according to one instruc-
tor, "When they fall they slide
down the slope like butter in
a hot pan."

Isn't it funny how little value other
people put on your time.

Send in only \$1.00 and we'll put you
on our mailing list for 1 year.

Legal Notices

COMMONWEALTH OF MASSACHUSETTS

Hampden ss Probate Court
To WILLIAM TAYLOR CLARK
of Canaan, in the State of New
York.

A libel has been presented to
said Court by your wife KATH-
LEEN T. MOYNAHAN CLARK
otherwise KATHLEEN TERESA
MOYNAHAN CLARK, of Agawam,
in the County of Hampden, pray-
ing that a divorce from the bond
of matrimony between herself
and you be decreed for the cause
of cruel and abusive treatment
and praying for alimony.

If you desire to object thereto,
you or your attorney should file
a written appearance in said
Court at Springfield, withintwen-
ty-one days from the twenty-
fourth day of May 1968, the return
day of this citation.

Witness, ABRAHAM I. SMITH,
Esquire, First Judge of said
Court, this tenth day of April
1968.

JOHN J. LYONS, Register
April 25, May 2, 9.

COMMONWEALTH OF MASSACHUSETTS

Hampden ss Probate Court
To all persons interested in the
estate of LOUIS C. ROSSI other-
wise LOUIS ROSSI late of Agaw-
am in said County, deceased.

A petition has been presented
to said Court, praying that ANNA
ROSSI of said Agawam or some
other suitable person be appoint-
ed administratrix of said estate.

If you desire to object thereto
you or your attorney should file a
written appearance in said Court
at Springfield, in the County of
Hampden, before ten o'clock in
the forenoon on the fourteenth day
of May 1968, the return day of this
citation.

Witness, ABRAHAM I. SMITH,
Esquire, First Judge of said
Court, this fifth day of April
1968.

JOHN J. LYONS, Register
April 18, 25, May 2.

COMMONWEALTH OF MASSACHUSETTS

Hampden ss Probate Court
To all persons interested in the
estate of RICHARD H. AVERY
late of Agawam in said County of
Hampden, deceased.

A petition has been presented to
said Court for probate of a cer-
tain instrument purporting to be
the last Will of said deceased by
JOHN M. P. O'MALLEY of
Springfield in the County of
Hampden praying that he be ap-
pointed executor thereof without
giving a surety on his bond.

If you desire to object thereto,
you or your attorney should file a
written appearance in said Court
at Springfield, in said County of
Hampden, before ten o'clock in
the forenoon on the fourteenth day
of May 1968, the return day of this
citation.

Witness, ABRAHAM I. SMITH,
Esquire, First Judge of said
Court, this eighth day of April
1968.

JOHN J. LYONS, Register
April 18, 25, May 2.

COMMONWEALTH OF MASSACHUSETTS

Hampden ss Probate Court
To all persons interested in the
estate of WILLIAM DREW NOW-
SKI late of Agawam in said Coun-
ty of Hampden, deceased.

A petition has been presented
to said Court for probate of cer-
tain instruments purporting to be
the last Will and Codicil of said
deceased by THEODORA DREW-
NOWSKI of said Agawam praying
that she be appointed adminis-
tratrix with the Will annexed, of said
estate, without giving a surety on
her bond.

If you desire to object thereto
you or your attorney should file a
written appearance in said Court
at Springfield, in said County of
Hampden, before ten o'clock in
the forenoon on the seventh day of
May, 1968, the return date of this
citation.

Witness, ABRAHAM I. SMITH,
Esquire, First Judge of said
Court, this first day of April
1968.

JOHN J. LYONS, Register
April 18, 25, May 2.

COMMONWEALTH OF MASSACHUSETTS

Hampden ss Probate Court
To all persons interested in the
estate of MINNIE J. TOWER late
of Agawam in said County of
Hampden, deceased.

A petition has been presented
to said Court for probate of a cer-
tain instrument purporting to be
the last Will of said deceased by
ELIZABETH TOWER HART-
WELL of Westfield, in said County
and HENRY MADISON TOWER of
West Suffield in the State of Con-
necticut praying that they be ap-
pointed executors thereof without
giving a surety on their bonds.

If you desire to object thereto,
you or your attorney should file a
written appearance in said Court
at Springfield, in said County of
Hampden, before ten o'clock in
the forenoon on the fourteenth day
of May 1968, the return day of this
citation.

Witness, ABRAHAM I. SMITH,
Esquire, First Judge of said
Court, this eighth day of April
1968.

JOHN J. LYONS, Register
April 18, 25, May 2.
